

Survival Strategies—True Story

For your assigned story, list at least three actions that were taken, one from the approach of each part of the triune brain. Use a plus sign or minus sign to evaluate whether this particular approach was useful or might actually have interfered with survival, and explain what the outcomes were. You can use the Survival Strategies sheet to give you some examples, but there may be others in your particular story.

Ally Group: _____

Story Title: _____

Situation or Problem	Reptilian Strategies	Limbic Strategies	Neocortex Strategies
Positive Outcomes	<div style="border: 2px solid red; border-radius: 15px; padding: 10px; display: inline-block;"> <p style="margin: 0;">NOT FOR PUBLIC RELEASE</p> </div>		
Negative Outcomes			

Were there any precautions that could have been taken *before* this situation occurred that would have had a positive impact or prevented disaster? What might they have been? If you were in this situation tomorrow, what do you think you would do?
